Professional Summary

Full-stack engineer with 8+ years of experience shipping client-facing web and mobile products in regulated, high-stakes environments. Built end-to-end test infrastructure from scratch using Playwright, Detox, and GitHub Actions CI/CD. Introduced real-world condition simulation including network latency, offline mode, and device fragmentation testing across a React Native stack. Currently deepening AI engineering skills through the Overclock Fellowship focused on LLM integration and customization. Combines a strong TypeScript/Node.js foundation with hands-on mobile testing, CI/CD pipeline design, and a track record of reducing crash rates and scaling test coverage in fast-paced startup environments.

Technical Skills

Frontend & Mobile: React, React Native, TypeScript, JavaScript

Backend & APIs: Node.js, Express, REST APIs, Redux, React Query, PHP

Testing & Quality: Playwright, Detox, Cypress, Jest, BrowserStack

DevOps & CI/CD: GitHub Actions, CodeMagic, Fastlane, E2E pipeline design, release gating

AI & LLMs: Overclock AI Fellowship - LLM customization, prompt engineering, AI integration

Experience

SOFTWARE ENGINEER (FRONTEND & SDET), MASTERWORKS; NEW YORK, NY | OCT 2021 – JUL 2025

- Served as the first dedicated SDET, building the entire automated testing infrastructure from scratch across web and mobile for an alternative investment platform used by thousands.
- Built Playwright E2E test suites from zero, growing web coverage from 0% to 80%; established Detox mobile regression testing on a React Native codebase.
- Introduced real-world condition simulation - network latency, offline mode, and device fragmentation across iOS and Android, to surface failure modes that happy-path suites miss in production. Leveraged BrowserStack to run cross-device and cross-browser test coverage at scale.
- Reduced the Android 30-day crash rate from 12% to under 1% by diagnosing root causes across the React Native stack, directly improving customer trust and retention.
- Shipped user-facing features, push notifications, gamified quizzes, live feeds – bridging engineering and product in a fast-paced startup environment.

QA ENGINEER, VOLO SPORTS; BOSTON, MA | JUL 2021 - OCT 2021

- Automated web testing with Cypress to improve deployment confidence and reduce manual QA overhead.

FULL STACK WEB DEVELOPER, MEDIACUTLET (CONTRACT); RED BANK, NJ | FEB 2019 - JUL 2021

- Delivered custom web applications for multiple clients using PHP and JavaScript, adapting solutions to diverse business needs. Managed end-to-end project delivery from client discovery to deployment and handoff.

FULL STACK WEB DEVELOPER, LOCAL WISDOM (CONTRACT); LAMBERTVILLE, NJ | AUG 2020 - JAN 2021

- Worked directly with clients to scope requirements, customize WordPress themes and plugins, and deliver tailored web solutions on tight timelines. Translated non-technical client feedback into responsive, production-ready designs with cross-browser compatibility.

Education

AI Engineering Fellowship – Overclock, 2026 (In Progress)

Certificate in Web Development – Rutgers University, 2016

Coursework in Information Technology & Informatics – Rutgers University, 2013 - 2017
